## **Chapter 1 Introduction**

## 1.1 Overview

Guarding Expert V3.0 mobile client software, which is designed for iPhone on the basis of iOS (Version 4.3 or higher), can be used to remotely monitor the live video from embedded DVR, NVR, network camera, network speed dome and DVS via wireless network, play back record files, control alarm output and realize PTZ control as well.

With this software installed in your iPhone, you are able to log onto the front-end device via Wi-Fi, 2G or 3G; besides, if there is no public IP available for the device, it's accessible by using a dynamic domain name, or by mapping ports to the public IP of router.

Notes:

- 1. Wi-Fi, 2G or 3G access service must be supported by the iPhone.
- 2. Network traffic charges may be produced during the use of this client software. Please refer to the local ISP.

## **1.2 System Requirements**

iOS 4.3 or higher version, including iPhone3GS, iPhone4, iPhone4S and iPhone5 series products.

## **1.3 Conventions**

In order to simplify the description, we define the "Guarding Expert (V3.0) mobile client software" as "software" and "DVR, NVR, DVS, IP camera, IP speed dome" as "device" in the following chapters.

## **Chapter 2 Installing and Uninstalling the Software**

## 2.1 Installing the Software

#### Steps:

- 1. Log onto the Apple Store.
- 2. Enter "Guarding Expert" to search the mobile client software.
- 3. Download and install it to your iPhone.
- 4. After having installed the software successfully, you can click icon to start the software.

## 2.2 Uninstalling the Software

Click and hold the  $\bigcirc$  icon in the program list until it changes to  $\bigcirc$ . Click  $\bigotimes$  to uninstall the mobile client software.

## **Chapter 3 Running the Software**

After having installed the software successfully, click is icon to run the software.

## **3.1 Interfaces Introduction**

The software has four main functions, including Live View, Remote Playback, Device Management and Configuration.

You can click  $\blacksquare$  to activate the main menu.

#### **Description of Main Menu**

Menu	Descriptions
<b>Iive View</b>	Live view, PTZ control, alarm outputs management, etc.
Remote Playback	Play back the recorded files.
Devices	Display device list, add/delete/modify device, view device information, etc.
Configuration	Configure password protection and software update. View software's version information, quick operation guide and main features.

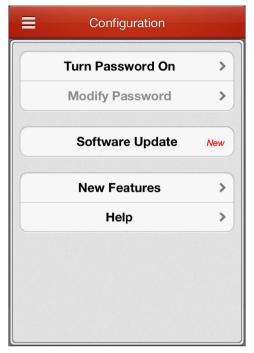

## **3.2 Password Protection**

With the password protection enabled, then only the user that has the password can access the software.

Task 1: Enable Password Protection *Steps:* 

1. Click  $\blacksquare$  and select  $\blacksquare$  to enter the Configuration interface.

2. Click Turn Password On to enter the password settings interface.

← Turn Password On				
Enter Password				
1	<b>2</b> АВС	3 Def		
<b>4</b> сні				
7 8 9 PQRS TUV WXYZ				
0 🛛				

3. Enter the password for the software and confirm it to activate the password protection.

Next time, if you want to run the software after exit, you need to enter the password to log in first.

#### Task 2: Modify the Password

Click **Modify Password** and enter corresponding information to modify the password.

← N	lodify Passwo	rd	← №	lodify Passwo	rd	← №	lodify Passwo	rd
	Old		New Confirm		New			
1	<b>2</b> АВС	3 DEF	1	<b>2</b> АВС	3 DEF	1	<b>2</b> АВС	3 DEF

	0	•		0	×		0	×

## Task 3: Disable Password Protection

### Steps:

- 1. Click **Turn Password Off** to disable the password protection.
- 2. Enter the password to confirm the settings.

← Turn Password Off				
Enter Password				
1	<b>2</b> авс	3 Def		
<b>4</b> сні	5 JKL	<b>6</b> мно		
7 8 9 Pars TUV WXYZ				
	0	×		

## **Chapter 4 Device Management**

## 4.1 Adding a Device

You need to add a device firstly that all operations such as live view, playback and device management can be accessible.

**Note:** The **Demo** is a demo added by default when you run the software for the

first time. You can view the live video (refer to *Chapter 5*) and play back the record files (refer to *Chapter 6*) of the demo. And you can also modify the demo (refer to *Chapter 4.2*) or remove the demo (refer to *Chapter 4.3*). *Steps:* 

1. Click  $\blacksquare$  and select  $\blacksquare$  to enter the Device Management interface.

2. Click 🛨 to add a new device.

- Ne	w Device	₿
Alias	New Device 02	8

Server address	www.hik-online.com	$\bigotimes$
Device domain	Enter device domain	
User Name	admin	8
Password	•••••	8
Camera No.	1	

GÂRD 7900 Series

- 3. Edit the device name in the **Alias** field.
- 4. Click the **Register Mode** item to select the register mode of the device to HiDDNS, IP/Domain, or IP Server, and configure the corresponding settings.

**HiDDNS:** When the device is registered on the HiDDNS server, you need to enter the HiDDNS server address and the device domain name registered on the server. **IP/Domain:** You can access the device through fixed IP address or domain name. You need to edit the IP address or domain address and the port of the device.

**IP Server:** You can access the device through IP Server. You need to set the IP Server address, and device identifier which is the device name or device serial No..

HIDDNS	~
IP/Domain	
IP Server	

- 5. Enter the login user name and password of the device to be added.
- 6. Click 🔳 to confirm the settings.

#### Notes:

- 1) If the device is successfully added, the software can obtain the camera information of the device.
- 2) Up to 100 devices can be added.
- 3) You can click **Start live view** to live view the newly added device. Please refer

to Chapter 5 for detailed operation about live view.

- Device Information			
Alias	7300

Camera No.	16	

- 3. Click 📃 to save the modification.
- 4. Click 🗲 to return to the Device Management interface.

## 4.3 Deleting a Device

In the Device Management interface, select a device and slide the item to access the

Delete button. Click Delete to delete the selected device.

## **Chapter 5 Live View**

After the device is successfully added, you can view live video from the devices, manage the alarm output of the device and control PTZ movement as well.

*Note:* The alarm output and PTZ control should be supported by the added device.

Click  $\blacksquare$  and select  $\blacksquare$  to enter the Live View interface. The screen will be displayed in 1-division mode by default.

#### **Description of Icons:**

lcons	Descriptions	lcons	Descriptions

⊻/⊻	Start/stop two-way audio	<b>*</b> / <b>*</b>	output management

*Note:* You can click to show the hidden icons and click to hide them.

### **Start Live View**

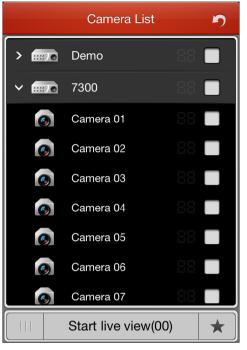

Steps:

1. Click 🔚 to display the added device list. Click a device node to list all the

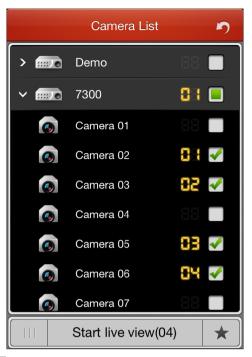

cameras under it.

*Note:* The name of the camera under the device is obtained from the device.

- 2. Check checkbox in the device item to select all the cameras under it, or check
  checkbox in the camera litem to select the specific camera as desired. *Notes:*
  - 1) If the channel-zero is supported by the device and it has been configured, you can select to live view by channel-zero.
  - 2) The number (e.g. 🎛) indicates the displaying window No..
  - If there is only one channel under the device, the icon of the device shows as
     Otherwise, it shows as

3. Click Start live view to start live view of the selected camera(s). Or you can clicki to return to the Live View interface.

*Note:* Up to 16 cameras can be selected for live viewing at the same time.

### **Favorites Configuration**

You can add the commonly used camera(s) to the favorites so that you can access the camera(s) conveniently.

#### Steps:

1. Perform the *Step 1* and *Step 2* of *Start Live View* to select the camera(s).

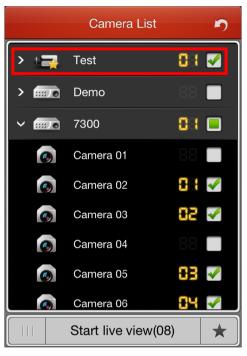

- 2. Click \star to add the camera(s) to the Favorites.
- 3. In the pop-up dialog box, enter the name for the favorites.

4. Click **Confirm** to save the settings.

The successfully added favorites will be shown in the device list area.

## Capture

In live view mode, select a live viewing window and click the 🔯 to capture a

picture.

*Note:* The captured pictures are saved in the *photo* folder of your iPhone by default. You can access the directory to view or delete the pictures.

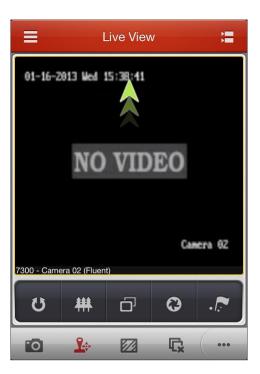

## **PTZ Control**

In live view mode, select a playing window and click  $\mathbb{I}$  to activate PTZ control panel, and the  $\mathbb{I}$  icon changes to  $\mathbb{I}$ .

*Note:* The PTZ control should be supported by the added device.

You can slide on the live view window to realize the pan left/right and tilt up/down movements. You can also pinch two fingers together to zoom out or spread them apart to zoom in the live view.

#### **Description of Icons**

Icons	Descriptions	lcons	Descriptions	
*	Zoom+	##	Zoom-	
ð	Focus+	5	Focus-	
Q	Iris+	0	Iris-	
U	Start / stop the auto-scan.		Set and call the preset.	
Note: Click 🗰 to activate the 🔺 and 🗰 buttons; click 🗖 to activate the 🗖				

and  $\Box$  buttons; click O to activate the O and O buttons.

#### **Setting a Preset**

#### Steps:

- 1. In the PTZ control mode, slide on the live view window to move the camera to the desired scene.
- 2. Click I to access the following dialog box.

0	0	1	
Call		Set	

- Slide the number area to set the preset No..
   Note: The preset No. should be between 1 and 256.
- 4. Click Set to finish the preset settings.

#### **Calling a Preset**

For the programmed preset, you can slide to set the preset No. in the dialog box and

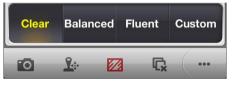

TGÂRD 7900 Series

click Call to call it.

After completion of PTZ control, click 🏂 to hide the PTZ control panel.

#### **Image Quality**

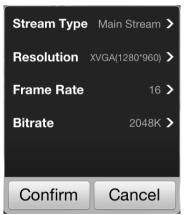

There are three defined image quality types provided, including Clear, Balanced and Fluent. And you can also customize the image quality. Click 22 to adjust the quality according to the performance of your network and phone hardware.

#### **Customize the Image Quality**

Steps:

1. Click Custom to activate the customized panel shown below.

2. Configure the parameters according to actual needs, including Stream Type, Resolution, Frame Rate and Bitrate.

3. Click Confirm to save the settings.

*Note:* The live view effect is related to the performance of your network and phone hardware. If the live view is not fluent or the screen appears blurred, please reduce the resolution, frame rate and bitrate of the camera in Custom mode, or set the image quality as Balanced or Fluent mode.

The following table shows the recommended frame rate and bitrate configuration for different resolution at H.264 video compression.

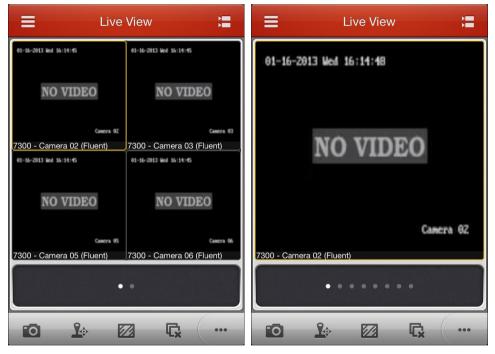

Resolution	1-ch	2-ch	3-ch	4-ch	Recommended Configuration
HD1080P	٧				Frame rate: 4fps; Bitrate: 1024Kbps
UXGA	٧				Frame rate: 4fps; Bitrate: 1024Kbps

### **Alarm Output Management**

You can control the alarm outputs of the added device by the software. *Note:* The alarm output should be supported by the device. *Steps:* 

- 1. Click to access the hidden icons.
- 2. Click 🖉 to activate the alarm output management panel.

3. Select an alarm output and click it to set it as to enable this alarm

output. You can also click the enabled alarm output **m** to set it as **m** to disable it.

### **Full-screen Live View**

During live view, you can rotate the iPhone to enter the full-screen mode. You can press and drag the toolbar to adjust its position.

*Note:* Please release the rotation lock of the iPhone to realize this function.

## **Chapter 6 Playback**

You can search the recorded video files from the added device for playback.

### Start Playback

#### Steps:

1. Click  $\blacksquare$  and select  $\blacksquare$  to enter the Remote Playback interface.

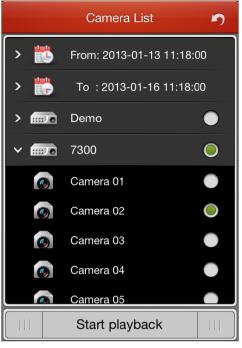

- 2. Click 🗄 to display the added device list.
- 3. Set the start time and end time in the **From** and **To** field to define the search condition.
- 4. Select a device node and click to list all the cameras under it.
- 5. Check C checkbox in the camera item to select a camera for playback.

#### Notes:

- 1) If you check C checkbox in the device item, then the first camera of the device is selected for playback.
- 2) Only the camera with record during that period can be played back successfully.

6. Click Start playback to start playback.

## Update the Software

When there is a new version available in the **App Store**, the software will prompt you to update the software. You can confirm to update the software immediately. You can also cancel it and perform the following steps to update the software next time as desired.

#### Steps:

1. Click  $\blacksquare$  and select  $\blacksquare$  to enter the Configuration interface:

=	Configuration	
	Turn Password On	>
	Modify Password	>
	Software Update	New
	New Features	>
	Help	>

- If the New is in the Software Update item, click Software Update to activate the software update dialog box.
- 3. Click **Confirm** to confirm updating the software and enter **App Store** to update the software.

*Note:* The *New* displays when there is a new version available in the **App store**.

#### **New Features and Help**

You can click **New Features** to view the main features of the software.

Click **Help** to enter the Help interface. You can view the version information and the quick operation guide of the software.

# Appendix

## Version History

### V 3.0

#### Added New Features:

- 1. New designed GUI provides convenient operations.
- 2. iPhone5 is supported.
- 3. Up to 16-ch synchronous live view.
- 4. Support live view by page.
- 5. Support live viewing of channel-zero.
- 6. Optimize the playing performance.
- 7. Display the quick operation guide and main features of the software.
- 8. Check new version automatically.
- 9. Image quality configurable during live view mode.
- 10. Alarm outputs management.
- 11. Password protection.

#### Modified:

- 1. Optimize PTZ control.
- 2. Delete the Alarm Management settings.
- 3. Delete the channel configuration.
- 4. Cancel the registration when logging in for the first time.

## Troubleshooting

• What kinds of devices are compatible with Guarding Expert (iPhone) mobile client software?

The devices which adopt H.264, MPEG4 or MJPEG video compression are compatible with this software.

• Why does the mobile client software prompt 'login failed' when access to the device via Wi-Fi?

Please check whether the Wi-Fi parameters are configured properly in your iPhone.

• After starting viewing the live video, why does the responding of the mobile device becomes very slow and the video is easy to get stuck?

This problem may due that the lower performance of your iPhone, please try to view less cameras at the same time, or decrease the frame rate and resolution, you may refer to the following parameter settings.
